SUMMARY

React Native Engineer with 4+ years of experience designing and building mobile products for iOS and Android, from first architecture decisions through App Store and Play Store release. Delivered a portfolio of 10+ apps spanning fitness, healthcare, finance, creative, and media, with hands-on ownership of native integrations, real-time backends, and performance tuning.

EXPERIENCE

React Native Developer | Vasundhara Infotech

Jul 2022 – Present

Surat, Gujarat

Own the full lifecycle, from architecture to store deployment, for a growing lineup of consumer apps built with **React Native**, **Expo Router**, and **native iOS/Android modules** (Kotlin, Swift) where platform APIs demand it. Build smooth, native-feeling interactions with **Reanimated** and **Gesture Handler**, and manage app state with **Redux Toolkit**, **Zustand**, and **TanStack Query** depending on the product's needs. Ship push notifications, deep linking, in-app purchases, and analytics across the portfolio, and maintain **CI/CD pipelines with GitHub Actions** to automate testing (Jest) and releases through App Store Connect and Google Play Console.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Kotlin, Swift

Mobile & Frontend: React Native (Expo & Bare), Expo Router, React Navigation, React.js, Node.js

State Management: Redux Toolkit, Zustand, TanStack Query, Context API

UI & Interactions: Reanimated, Gesture Handler, Native Modules

Backend & Cloud: Firebase (Auth, Firestore), RESTful APIs, Real-time Data Sync

Integrations: Payment Gateways (Stripe, PayPal, Payline, Crypto), In-App Purchases, Push Notifications, Deep Linking, Maps & Geolocation, QR/Barcode Scanning, Analytics

Tools & Practices: Git, GitHub Actions, EAS Build & Submit, OTA Updates, CI/CD, Jest, Figma, App Store Connect, Google Play Console, Agile Development, Localization (i18n)

PROJECTS

Champion Spirit (Fitness App) [Play Store](#) | [App Store](#)

Training platform connecting athletes with coaching, real-time progress tracking, and class bookings. Integrated multiple payment providers (Stripe, Payline, and crypto payments) alongside a credit-based membership system, live studio maps, and in-app chat. Set up OTA updates and EAS Build/Submit for fast, App Store review-free iteration. Tech: React Native, Expo, TypeScript, Firebase, Zustand, React Query.

Vinea (Healthcare CME Platform) [Play Store](#) | [App Store](#)

Learning platform helping healthcare professionals manage CME/MOC credits and state licensing. Built AI-driven course recommendations, secure document uploads, and real-time credit dashboards on Firebase Authentication and Firestore. Tech: React Native, TypeScript, Firebase.

Gigglam (Real-Time Collaborative Photo Editor) [Play Store](#)

Real-time photo creation tool where friends join the same canvas and edit a photo together live, adding emojis, stickers, and effects with every change syncing instantly across devices. Also built a voice-recording feature that layers a sung or spoken message onto a photo and exports it as a shareable cinematic video. Tech: React Native, Firebase Realtime Sync.

AR Chitram (AR Drawing & Sketch App) [Play Store](#)

AR camera overlay that traces a chosen image onto paper in real time for guided sketching and anime-style practice. Built an object fill-color tool that detects distinct regions in a traced image and lets users tap to fill each one with color, plus a personal gallery to save and track artwork. Tech: React Native, AR Camera, Native Modules.

EverySpend (Finance App) [Play Store](#)

Privacy-first personal finance tracker with clear spending visualizations, built with an offline-first data layer so balances and charts stay accurate without a constant connection.

DailySync (Reminder App) [Play Store](#)

Context-aware reminder engine that helps people organize routines and protect their focus, using Expo's scheduling APIs to trigger reminders around real context rather than fixed alarms.

Roofpair (Field Service Platform) [App Store](#)

Field operations and dispatch tool for roofing service professionals, coordinating job assignments and crew scheduling from the field.

Other Projects

NoireTV (OTT/news app with in-app payments, program reminders, multilingual support across 13 languages, and a custom media player) and Phillips (OTT app for streaming movies and shows).

EDUCATION

Bachelor of Science in Computer Applications CGPA: 7.40

SDJ International College | Nov 2019 – Feb 2022
